TITLE : PAPER FEEDING DEVICE

ABSTRACT : PURPOSE: To facilitate adjustment of the positions of side fences by fixing one side fence through a process of engaging a projecting part of a specified position fixed-type stopper with a recessed groove of a first engaging part, and fixing the other side fence through a process of engaging a stopper claw of a claw fixed-type stopper with an engaging tooth of a second engaging part.

CONSTITUTION: A paper feeding tray housing part in a copying machine is provided with a paper feeding tray 1 capable of being taken in and out from the front of a main body, and side fences 3, 4 are respectively provided on the front side and the innermost side in the tray drawing-out direction Y in this paper feeding tray 1. A claw fixed-type stopper 23, a specified position fixed-type stopper 25 are respectively provided on stopper supporting parts 5 of respective side fences 3, 4 so as to be turned by the specified angle, and a stopper claw 24 is formed on the lower part of the stopper 23 at a specified pitch, and a projecting part 26 is formed on the lower part of the stopper 25. Engaging parts 27, 28 are provided on the paper feeding tray 1 so as to face the stopper claw 24 and the projecting part 26, and the adjustment of the positions of the side fences 3, 4 is achieved by the engagement.
